PROFESSIONAL SUMMARY

Highly motivated and results-oriented Software Engineer with a strong foundation in secure development practices and a passion for cybersecurity. I recently completed the Google Cybersecurity Professional course and am eager to leverage this knowledge alongside my experience in integrating security best practices into the SDLC (Software Development Lifecycle). Proven ability to deliver high-quality C# .NET Core solutions, troubleshoot complex issues, and collaborate effectively with engineering teams. Seeking to transition into a security-focused role where I can combine my technical skills with my growing cybersecurity expertise. Adept at leveraging AI-assisted development tools (GitHub Copilot with multiple LLM models) to accelerate debugging and feature delivery across large, complex codebases.

CORE COMPETENCIES

- Data security
- C#, Python, JavaScript
- EF Core, Dapper
- ASP.NET, ABP, React, Redux
- RESTful, SOAP, OData
- MediatR, CQRS
- Identifying and resolving bugs
- Collaborating with stakeholders
- Mentoring junior developers
- Attention to Detail
- Time Management
- Adaptability
- MSSQL, Postgres, MongoDB
- Git, Git workflow
- Clean Architecture
- Linux, MacOS, Windows
- Azure DevOps
- Azure Key Vault
- Docker Containerization
- Web Apps
- Grafana, Azure AppInsights
- Microservices
- Hangfire, Quartz
- Kafka, MassTransit, RabbitMQ
- Clean Architecture
- Wireshark, Nmap, Burpesuite
- Power BI
- AI-Assisted Development (GitHub Copilot)
- Prompt Engineering / LLM Orchestration

PROFESSIONAL EXPERIENCE

C# Software Developer *July 2024 – Current*

Retain, UK

- Optimized database queries and implemented indexing strategies, significantly improving application speed and reliability.
- Developed a recurring booking system, which played a pivotal role in securing deals with BA Tax GmbH by enhancing usability and meeting client expectations.
- Conducted in-depth research and evaluations of technical solutions, providing insights and recommendations for best practices.
- Identified, investigated, and resolved bugs, ensuring a seamless and reliable user experience.
- Developed and optimized backend features, strengthening the core product and contributing to successful client acquisitions.
- Maintained high code quality standards through rigorous testing and peer review processes.
- Diagnosed and resolved production bugs by reproducing issues end-to-end (FE to API), capturing request/response payloads, and using AI-driven root-cause investigation to accelerate fixes.
- Orchestrated GitHub Copilot and multiple LLM models, selected by task complexity, to deliver features faster, building deep working knowledge of a large, complex solution codebase.

Tech Stacks: Mapster, ASP.NET Web API, Redis, Power BI SQL, .NET Core, C#, Entity Framework (EF) Core, Microsoft SQL Server, Framework, Azure services, DurableTask Framework,

C# Software Developer *Jan 2023 – July 2024*

HydrogenPay, Lagos

- Collaborated with security teams to integrate security best practices into the SDLC, including code reviews for potential vulnerabilities.
- Reduced security incidents by 35% through improved secure coding practices and security awareness training within the development team.
- Conducted threat modelling exercises to identify and mitigate potential security risks within the platform.
- Spearheaded the development of a user-friendly merchant portal, increasing engagement by 30% and enabling efficient transaction management.
- Integrated and deployed APIs for data visualization, leading to a 45% reduction in processing time and improved data analysis capabilities.
- Partnered with UX/UI teams to optimize backend interactions and ensure seamless data flow.
- Collaborated on software design and architecture, ensuring scalability and maintainability.
- Optimized and modernized the existing code base, identifying and resolving critical bugs through code reviews.
- Mentored junior developers, fostering best practices and promoting knowledge sharing within the team.
- Effectively managed fortnightly sprints and participated in biweekly demos, showcasing progress and addressing feedback.

Tech Stacks: Mapster, ASP.NET Web API, Quartz, Redis, RabbitMQ, .NET Core, C#, Entity Framework (EF) Core, Microsoft SQL Server, Redis, Solhigson Framework

C# Software Developer *Apr 2021 – Jun 2023*

Sterling Bank Plc, Lagos

Project: Digital Onboarding is a digital platform that offers a user-friendly service for diverse financial needs. It enables individuals to open various accounts seamlessly, without physical documentation

- Enhanced application security by 40% through the implementation of end-to-end data encryption and role-based access controls.
- Collaborated with stakeholders (Product Owners, QA) to deliver clear, maintainable, and well-documented code.
- Developed and optimized key loan applications, achieving:
  - 20% faster processing speed, increasing loan approval efficiency.
  - Enhanced reliability, minimizing downtime and ensuring smooth loan processing.
- Streamlined customer account opening through application development, resulting in:
  - Improved user experience with reduced friction points and simplified onboarding.
  - 15% reduction in processing time for faster account setup.
- Elevated data security by implementing end-to-end data encryption using AES, mitigating potential vulnerabilities.
- Collaborated with cross-functional teams to:
  - Seamlessly integrate new features, enhancing functionality and user experience.
  - Optimize existing functionalities for improved performance and efficiency.
- Actively participated in requirements gathering, refinement, and solution design/implementation, contributing to successful project delivery.

Tech Stacks: .NET 6, ASP.NET Core, C#, MSSQL, EF Core 6, Open API, REST, SOAP Services, Docker, Hangfire, ABP Framework

C# Software Developer *Jun 2020 – Feb 2023*

Prunedge, Lagos

Designed and developed robust web-based backend applications for seamless front-end interactions.

- Collaborated closely with an Agile team to effectively translate user needs into technically sound solutions.
- Developed and optimized key loan applications, focusing on backend functionalities to:
  - Boost processing speed by 20%
  - Enhance reliability, minimizing downtime, and ensuring smooth loan processing.
- Championed adherence to software development standards and procedures, ensuring code quality and maintainability.
- Embraced Agile methodology by:
  - Actively participating in fortnightly sprints, contributing to timely project delivery.
  - Presenting progress and addressing feedback through biweekly demos.

Tech Stacks: .NET 6, ASP.NET Core, C#, MSSQL, Postgres, EF Core 6, Open API, REST, SOAP Services, SignalR, Docker, Hangfire, Sendgrid, Azure Blog Storage, AWS S3 Bucket, Redis

Software Engineer *Apr 2018 – Apr 2020*

Andela, Lagos

Andela scales high-performing distributed engineering teams by connecting them remotely with top talents worldwide. They vet some of the top engineers and provide a community that engineering teams worldwide can leverage to build and scale their businesses.

- Designed and developed in-house applications using React, Redux, Typescript, ES6, and SASS.
- Initiated and implemented new features to meet user stories' requirements.
- Contributed to the entire application lifecycle, focusing on coding, debugging, and troubleshooting.
- Streamlined team member workflow for efficient task completion.

Tech Stacks: Html, CSS, SASS, JavaScript, ReactJs, Typescript, AngularJs, HTML5, NodeJS

EDUCATION

- **Advance Diploma in Software Engineering (ADSE) –** Aptech Computer Education
- **Yaba College of Technology – Compute Science, Lagos**

NANO DEGREE

- **Microsoft Azure Cloud Developer –** Udacity
  https://confirm.udacity.com/FLGC5N3F
  August - December 2022
- **Google Cybersecurity Professional – Coursera**
  https://coursera.org/share/878a7f24691c21b9c63e735f24c02cc4
  November 2023 - January 2024
